STANDARD ON EVERY VEHICLE

FastPLEX is fully programmable and multiplexed with advanced features such as full color touch screen control interface, integrated incident timers with audible alerts and complete monitoring capabilities for system wide control. FastPLEX monitors ALL FastLane added components meaning that you will no longer have to ensure that the truck is plugged in or remove the radios from the portable chargers before parking it. FastPLEX will monitor all loads and shutdown any item before the vehicle's battery system reaches critically low levels. Thus extending charging systems and battery life ensuring the vehicle is always "ready for service".

FEATURE	DETAILS
Chassis	Ford SD F550
Lighting	Whelen LED Package
Electrical Controls	FastPLEX Multiplexed, Standard
Console	Fully Custom Floor Console
Graphics	Standard, Reflective, Gold, etc.
Body	Combination Commercial & Custom
Boat Motor Carts	Customized HD Motor Carts

Custom Contoured Console

This custom contoured floor console features FastLane exclusive PolyBuild™ coating, device specific custom cut aluminum powder coated faceplates, OEM style fuse block (located on driver side), oversized marine style cup holders, 12V HD power points with dust covers, radio cutouts with mounting brackets and open storage pocket.

Customized Commercial Body

A combination of a commercial body with customized compartmentation for modified use in swift water rescue operations. Customizations include top mount custom aluminum storage compartments with flip-up lids on gas stays, rear power liftgate to assist on loading heavy equipment (boat motors), custom fabricated aluminum boat rack with front wind deflector.

Boat Motor Carts with Custom Mounts

This vehicle features two (2) heavy duty customized boat motor carts modified specifically to ease loading, unloading and storage of boat motors. In addition the boat carts feature integrated e-track system for secure storage. A custom rear stokes mounting solution is included for basket & gear.
