STANDARD ON EVERY VEHICLE

FastPLEX is fully programmable and multiplexed with advanced features such as full color touch screen control interface, integrated incident timers with audible alerts and complete monitoring capabilities for system wide control. FastPLEX monitors ALL FastLane added components meaning that you will no longer have to ensure that the truck is plugged in or remove the radios from the portable chargers before parking it. FastPLEX will monitor all loads and shutdown any item before the vehicle's battery system reaches critically low levels. Thus extending charging systems and battery life ensuring the vehicle is always "ready for service".

FEATURE	DETAILS
Chassis	SUV or Pick-up Platforms
Lighting	All Major Brands Offered
Electrical Controls	FastPLEX Multiplexed, Standard
Console & Cabinet	Fully Custom with 3D Rendering
Graphics	Standard, Reflective, Gold, etc.

Custom Contoured Console

This custom contoured floor console features FastLane exclusive PolyBuild™ coating, device specific custom cut aluminum powder coated faceplates, OEM style fuse block (located on driver side), oversized marine style cup holders, 12V HD power points with dust covers, Gamber Johnson computer docking arm and open storage pocket.

Custom Rear Command Cabinet

Featuring the same PolyBuild™ coating as the front console, this cabinet was purposed built for the customer. Additional features include a rear radio control console, laptop roll-out tray, binder resource drawer (on 150# slides), HD flip up command drawer (on 300# slides), a sundry drawer (on 150# slides) and a fully adjustable shelf (on 1/2" UniStrut).

Touchscreen Command Board

FastLane has partnered with Incident Response Technologies to offer their Rhodium Incident Management software. A cloud based solution, Rhodium allows for all fire ground resources to communicate, literally, on the same page. Options for fixed touch screen system, laptop, tablet and smart phone deployment.
