Charting

THE PROVEN EMS INTEGRATION PLATFORM

Streamline your on-the-go charting with emsCharts Gold Mobile. emsCharts Gold Mobile allows emergency service personnel to collect electronic patient information in real time by using a tablet PC, a notebook computer, or a Microsoft Surface. This native, secure, and efficient application is a great companion to emsCharts Gold Web interface and facilitates mobile pre-hospital data collection. In addition, all information is uploaded to the emsCharts Cloud in a HIPAA compliant fashion and synchronized to other data associated with the patient transport.
