emsCharts Gold

Charting

THE PROVEN EMS INTEGRATION PLATFORM

EMS providers can now run emsCharts Gold on either an iOS or Android tablet or phone. emsCharts Gold Tablet runs as a native application and puts the power of emsCharts Gold on an easy-to-use tablet. This allows you to perform your pre-hospital charting responsibilities with devices disconnected from the Internet. Once an Internet connection is reestablished, all information is uploaded to the emsCharts Cloud in a HIPAA compliant fashion.

FEATURES AND SYSTEM REQUIREMENTS

STANDARD FEATURES
▸ Predictive type-ahead functionality and lookups
▸ Touch-screen navigation
▸ Great for rapid documentation requirements
▸ Customizable to your documentation needs
▸ Time and Vital Sign quick action buttons
