

## VENTILATE YOUR PATIENTS WITH CONFIDENCE

The SPUR II from Ambu combines optimal tidal volume delivery\* with capnography to help ensure safe & reliable manual resuscitation.

Utilizing its unique M-port and a gas sampling line, the SPUR II facilitates sidestream EtCO<sub>2</sub> monitoring by conveniently providing caregivers with all the tools necessary to properly ventilate patients in an emergency situation.

## Ambu® SPUR® II with EtCO<sub>2</sub>

### KEY BENEFITS

Produces clean and consistent waveforms

Unique filtration system helps protect the monitor from moisture

Direct M-port connection reduces dead space

Eliminates need for separate sample line and adapters resulting in SKU reduction

Reflective connector compatible with most capnography monitors

Delivers tidal volumes which meet AHA standards for cardiopulmonary resuscitation\*

\*AHA guidelines state that tidal volumes of approximately 500-600 mL (6-7 mL per kg) are sufficient for adult resuscitation [www.ahajournals.org/doi/full/10.1161/CIRCULATIONAHA.110.970939](http://www.ahajournals.org/doi/full/10.1161/CIRCULATIONAHA.110.970939)
