

With the Introcan
Safety® IV Catheter
Safety is not an option—
it's automatic.

B. Safe.
B. Automatic.

Sharing Expertise®
It's more than a philosophy.

It's our promise to the healthcare community and ourselves to continuously seek knowledge. To expand it. To apply it. To share it. All to help improve and save lives.

This is Sharing Expertise.
This is B. Braun.

Think your
safety IV
catheters
are being
activated?

When safety isn't automatic, results can be catastrophic.

Studies show:

- Up to 21% of safety IV catheters were not activated by the user.^{1,2}
- Safety devices were activated on only 83% of sample devices examined during audits of disposal containers.³
- "...passive features are more effective in preventing needlestick injuries than devices that rely on a user-activated design."⁴

Think again.

The Introcan Safety[®] IV Catheter

Makes safety and compliance automatic.

Automatic safety shield cannot be bypassed.

- B. Braun's passive technology:
- Deploys automatically
 - Cannot be bypassed
 - Promotes compliance
