

SSCOR

SSCOR VX-2

Complies with SAE J3043 Standard!

SSCOR VX-2

The SSCOR VX-2® is a portable, powerful battery powered suction unit that can be mounted in the action area of an ambulance and used as onboard suction. The optional charging/retention bracket connects the VX-2 to vehicle power at all times. With its variable regulator and gauge, outward facing controls, and drawing its power from the vehicle, the VX-2 is setup for on-board

suction. If portable suction is required at the scene, the VX-2 can easily be removed from the retention bracket and used as portable suction, drawing power from its battery.

The VX-2 comes equipped with a battery care system which insures the battery is charged to an optimal level, prevents deep discharge and indicates battery condition.

Use the SSCOR Onboard Canister Clip #230-00003 (sold separately) and a Bemis 1200cc canister as shown above for SAE J3043 compliance.

SAE J3043 and EN1789 compliant Charging/Retention Bracket. Holds to a force of 25 G and conducts vehicle power to run and charge the unit.

OPTIONS!

Different solutions for different needs.

	VX-2 Model #2310BV	VX-2 Model #2310V
Size	17" L x 9" H x 5.25" W 43.2cm L x 22.9cm H x 13.3cm W	
Weight	8.6 lbs. or 3.9 kg	
Vacuum Pump	12V DC oil-less diaphragm. Clinical Airflow >=30LPM	
Regulator	Variable Regulator and Gauge	
Canister	Bemis canister. For canister options, see http://www.sscor.com/S-SCORT_VX2_canister_battery.html	
Run Time (full capacity)	45 minutes (+/- 10%)
