UNRIVALED CRAFTSMANSHIP AND CUSTOMIZATION**

BRAUN MMC

MULTIPLEX ELECTRICAL SYSTEM FOR BRAUN AMBULANCES

Emergency service providers are in the driver's seat with our next-generation multiplex electrical system. Our revolutionary system is designed to optimize vehicle intelligence, boost ambulance performance, and enhance the overall vehicle environment.

WHAT IS MMC?

It's time to take control of your ambulance fleet with the Multiplex Modular Connected (MMC).

Intelligent Control System

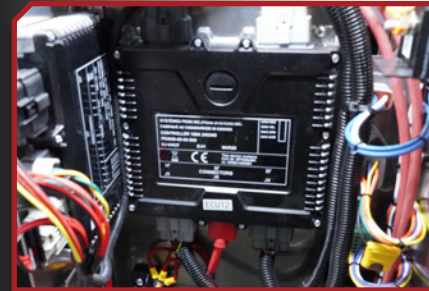

Empowering the ambulance environment, the MMC communicates with the ambulance chassis and the conversion, unlocking data and enabling your service to make informed decisions.

Boosts Performance

Engineered for ambulances, this intelligent control system has full capability to customize the ambulance environment, optimize fleet performance, and extend the life of the ambulance.

Trusted & Reputable Solution

Backed by proven technology, our new multiplex systems have supported EMS services globally since 2010.

INTELLIGENTLY POWERING EMERGENCY RESPONSE FLEETS FOR TODAY AND TOMORROW

BENEFITS FOR EMS/FIRE SERVICES

- **Empowers Fleet Management** – AVL ready for your choice of fleet telematics, supporting decisions for fleet safety, optimal performance, and cost savings.
- **Simplified System Management** – Best-in-class architectural design with centralized control, ensuring scalability for future technology and ease of service with single node programming.
- **Grow with Technology** – Your service can grow with system development, deploying controls at your own pace, and integrating plug-ins as the fleet desires.
- **24/7 Serviceability** – Manufacturer supports worldwide remote diagnostics live through Remote Viewer software.
- **Longevity & Cost Savings** – Extend ambulance life by optimizing system intel to maximize fleet efficiency and maintenance while minimizing downtime and costs.
- **Enabled Vehicle Diagnostics** – Free Bluetooth app (VisionPlex Mobile) for troubleshooting through real-time input/output visibility while in proximity, helping you stay on top of preventative maintenance.
- **Brand Agnostic** – Flexible system that is compatible and interfaces easily with 3rd party technologies.
- **Compatible with Chassis Manufacturers** – Seamless integration with ever-expanding technologies and telematic access from chassis manufacturers.

MMC FEATURES

-  **Emergency & working lights enhance safety for crew and patients**
 - Scene lights fade in/fade out to help reduce stress on the eyes.
 - Optional automatic smooth emergency pattern activated when the vehicle is in Park to avoid distraction to other drivers.
 - Optional day/night mode adjusts emergency lights intensity depending on ambient light to avoid blinding other drivers.
-  **A modern LCD touchscreen improves practical & technical interaction**
 - Delivers improved visibility & interface with visual & audio feedback.
 - Responds to sensitive touch, even through layers of gloves, with a new ergonomic design.
 - Quick and intuitive access to many enhanced features (e.g., stopwatch, integrated clock, light intensity adjustment).
 - Emergency functions (physical/mechanical) remain as simple switches for ease.
-  **The AVL-CAN interface has been enhanced with new telematic data**
 - Provides flexibility for end users to add signal by software update instead of wiring changes.
 - Built-in 100+ signals available.
-  **Bluetooth Diagnostic Tool a new digital application for real-time diagnostics**
 - View electrical inputs & outputs in real time, on your mobile device.
 - Troubleshoot or recall data at any time.
 - Secured data & information with a read-only connection.
-  **Low-power sleep mode protects conversion batteries**
 - Specifically designed with a low-power sleep mode, the MMC will reduce power consumption significantly when the conversion battery is not charging.
-  **The optional shoreline indicator ensures no surprises with visual markers**
 - Easily identify the charging states of vehicle's batteries with multiple-states indicator.

Important

- Some features may require additional software to support system intelligence (ie. Vehicle diagnostics, Vehicle Tracking, etc.).
- MMC AVL interface is compatible with Pran, Acetech, CDWare & Telus SkyHawk.
